SUMMARY

Foreman with over 19 years of experience who has consistently increased productivity and decreased costs through innovation of processes and schedules. Ability to manage crews of up to 45 people.

HIGHLIGHTS

- Streamlined manufacturing schedules resulting in a 20% cost reduction and a 30% increase in output efficiency
- Designed new jig that turned a routine task into a one person job, where it had previously taken three men to complete the task
- Devised new suspension method that permitted the use of one crane and operator to complete a routine task that had formerly required two cranes
- Advised employee, frustrated to the point of quitting, on a more efficient method of completing his assigned task, allowing the employee to complete his task by the end of the day with no further frustration
- Managed crews of up to 45 employees, successfully achieving target completion dates

TICKETS AND CERTIFICATION

- CWB Supervisors
- B-Pressure Welding
- CWB All Position Stick
- Standard First Aid and CPR
- Fall Arrest
- LSE (Leadership for Safety Excellence)
- Ground Disturbance
